1. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

Claims 1-24 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

2. Claims 20-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 20-24 are not supported by the original disclosure since there is no indication in the original disclosure that the assigned uplink and downlink time slots are dependent on the total demand for data packet in the cell.

3. Claims 1-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2732

In claim 1, it is not clear what is meant by "symmetrical number" and "asymmetrical number" (lines 45-46). How can a number be symmetrical or asymmetrical? Please clarify. Applicants are requested to reference the claimed "symmetrical number" and "asymmetrical number" to the specification, so metes and bounds can be determined from the claim language. Claims 15 and 17-19 have the same problem.
